# Safety data sheet according to Regulation (EC) No 1907/2006, Annex II

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### **1.1 Product identifier**

# Mehrzweckfett

 1.2 Relevant identified uses of the substance or mixture and uses advised against Relevant identified uses of the substance or mixture: Lubricant
 Uses advised against: No information available at present.

# 1.3 Details of the supplier of the safety data sheet

LIQUI MOLY GmbH Jerg-Wieland-Str. 4 89081 Ulm-Lehr Tel.: (+49) 0731-1420-0 Fax: (+49) 0731-1420-88

Qualified person's e-mail address: info@chemical-check.de, k.schnurbusch@chemical-check.de Please DO NOT use for requesting Safety Data Sheets.

# 1.4 Emergency telephone number

Emergency information services / official advisory body:

**Telephone number of the company in case of emergencies:** +49 (0) 700 / 24 112 112 (LMR)

+1 872 5888271 (LMR)

#### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture Classification according to Regulation (EC) 1272/2008 (CLP) The mixture is not classified as dangerous in the terms of the Regulation (EC) 1272/2008 (CLP).

#### 2.2 Label elements Labeling according to Regulation (EC) 1272/2008 (CLP)

EUH208-Contains Naphthenic acids, zinc salts, basic. May produce an allergic reaction. EUH210-Safety data sheet available on request.

#### 2.3 Other hazards

The mixture does not contain any vPvB substance (vPvB = very persistent, very bioaccumulative) or is not included under XIII of the regulation (EC) 1907/2006 (< 0,1 %).

The mixture does not contain any PBT substance (PBT = persistent, bioaccumulative, toxic) or is not included under XIII of the regulation (EC) 1907/2006 (< 0.1 %).

The mixture does not contain any substance with endocrine disrupting properties (< 0,1 %).

Page 2 of 12 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

# **SECTION 3: Composition/information on ingredients**

#### 3.1 Substances

#### n.a. 3.2 Mixtures

œ

| 5.2 MIATOR 5   |                         |
|--|-------------------------|
| Naphthenic acids, zinc salts, basic                                    |                         |
| Registration number (REACH)  | 01-2119988500-34-XXXX   |
| Index  |                         |
| EINECS, ELINCS, NLP, REACH-IT List-No.                                 | 282-762-6               |
| CAS  | 84418-50-8              |
| content %  | <1                      |
| Classification according to Regulation (EC) 1272/2008 (CLP), M-factors | Eye Irrit. 2, H319      |
|  | Skin Sens. 1, H317      |
|  | Aquatic Chronic 3, H412 |

For the text of the H-phrases and classification codes (GHS/CLP), see Section 16.

The substances named in this section are given with their actual, appropriate classification!

For substances that are listed in appendix VI, table 3.1 of the regulation (EC) no. 1272/2008 (CLP regulation) this means that all notes that may be given here for the named classification have been taken into account.

## **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

First-aiders should ensure they are protected!

Never pour anything into the mouth of an unconscious person!

#### Inhalation

Normally not necessary.

#### Skin contact

Remove polluted, soaked clothing immediately, wash thoroughly with plenty of water and soap, in case of irritation of the skin (flare), consult a doctor.

#### Eye contact

Remove contact lenses.

Wash thoroughly for several minutes using copious water. Seek medical help if necessary.

#### Ingestion

Rinse the mouth thoroughly with water.

Do not induce vomiting. Consult doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed

Where relevant delayed occuring symptomes and effects will be found in section 11. or at the exposure routes under section 4.1. In certain cases, the symptoms of poisoning may only appear after an extended period / after several hours.

reddening of the skin

Allergic reaction possible.

# 4.3 Indication of any immediate medical attention and special treatment needed

Symptomatic treatment.

**SECTION 5: Firefighting measures** 

## 5.1 Extinguishing media

#### Suitable extinguishing media

CO2 Foam Dry extinguisher

#### Unsuitable extinguishing media

High volume water jet

#### 5.2 Special hazards arising from the substance or mixture

In case of fire the following can develop: Oxides of carbon

Page 3 of 12

ആ

Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

## 5.3 Advice for firefighters

For personal protective equipment see Section 8. In case of fire and/or explosion do not breathe fumes. Protective respirator with independent air supply. According to size of fire Full protection, if necessary. Dispose of contaminated extinction water according to official regulations.

#### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

#### 6.1.1 For non-emergency personnel

In case of spillage or accidental release, wear personal protective equipment as specified in section 8 to prevent contamination. Ensure sufficient ventilation, remove sources of ignition.

Avoid dust formation with solid or powder products.

Leave the danger zone if possible, use existing emergency plans if necessary.

Avoid contact with eyes or skin.

If applicable, caution - risk of slipping.

#### 6.1.2 For emergency responders

See section 8 for suitable protective equipment and material specifications.

#### 6.2 Environmental precautions

If leakage occurs, dam up.

Resolve leaks if this possible without risk.

Prevent from entering drainage system.

Prevent surface and ground-water infiltration, as well as ground penetration.

If accidental entry into drainage system occurs, inform responsible authorities.

#### 6.3 Methods and material for containment and cleaning up

Soak up with absorbent material (e.g. universal binding agent) and dispose of according to Section 13.

Or: Pick up mechanically and dispose of according to Section 13.

#### 6.4 Reference to other sections

For personal protective equipment see Section 8 and for disposal instructions see Section 13.

#### **SECTION 7: Handling and storage**

In addition to information given in this section, relevant information can also be found in section 8 and 6.1.

# 7.1 Precautions for safe handling

#### 7.1.1 General recommendations

Ensure good ventilation.

Avoid contact with eyes.

Avoid long lasting or intensive contact with skin.

Do not carry cleaning cloths soaked in product in trouser pockets.

Eating, drinking, smoking, as well as food-storage, is prohibited in work-room.

Observe directions on label and instructions for use.

#### 7.1.2 Notes on general hygiene measures at the workplace

General hygiene measures for the handling of chemicals are applicable.

Wash hands before breaks and at end of work.

Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

# 7.2 Conditions for safe storage, including any incompatibilities

#### Not to be stored in gangways or stair wells.

Store product closed and only in original packing. Protect from direct sunlight and warming. Store at room temperature.

#### 7.3 Specific end use(s)

No information available at present.

**SECTION 8: Exposure controls/personal protection** 

Page 4 of 12

Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

#### 8.1 Control parameters

| Chemical Name                  | Calcium carbonate |           |                    | Content %: |
|--------------------------------|-------------------|-----------|--------------------|------------|
| WEL-TWA: 4 mg/m3 (respirable d | ust), 10 mg/m3    | WEL-STEL: |                    |            |
| (total inhalable dust)         |                   |           |                    |            |
| Monitoring procedures:         |                   | -         |                    |            |
| BMGV:                          |                   |           | Other information: |            |

| Distillates (petroleum), hydrotreated heavy paraffinic |                  |                            |                  |            |       |            |      |  |  |
|--|------------------|----------------------------|------------------|------------|-------|------------|------|--|--|
| Area   | a of application | Exposure route /           | Effect on health | Descriptor | Value | Unit       | Note |  |  |
|  |                  | Environmental              |                  |            |       |            |      |  |  |
|  |                  | compartment                |                  |            |       |            |      |  |  |
|  |                  | Environment - oral (animal |                  | PNEC       | 9,33  | mg/kg feed |      |  |  |
|  |                  | feed)                      |                  |            |       |            |      |  |  |

WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany).

(8) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (11) = Inhalable fraction (Directive 2004/37/CE). (12) = Inhalable fraction. Respirable fraction in those Member States that implement, on the date of the entry into force of this Directive, a biomonitoring system with a biological limit value not exceeding 0,002 mg Cd/g creatinine in urine (Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute reference period).

(8) = Inhalable fraction (2017/164/EU, 2017/2398/EU). (9) = Respirable fraction (2017/164/EU, 2017/2398/EU). (10) = Short-term exposure limit value in relation to a reference period of 1 minute (2017/164/EU). | BMGV = Biological monitoring guidance value EH40. BGW = "Biologischer Grenzwert" (biological limit value, Germany) | Other information: Sen = Capable of causing occupational asthma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage.

\*\* = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the goal of revision. (13) = The substance can cause sensitisation of the skin and of the respiratory tract (Directive 2004/37/CE), (14) = The substance can cause sensitisation of the skin (Directive 2004/37/CE).

#### 8.2 Exposure controls 8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction.

If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn.

Applies only if maximum permissible exposure values are listed here.

Suitable assessment methods for reviewing the effectiveness of protection measures adopted include metrological and non-metrological investigative techniques.

These are specified by e.g. EN 14042.

EN 14042 "Workplace atmospheres. Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents".

#### 8.2.2 Individual protection measures, such as personal protective equipment

General hygiene measures for the handling of chemicals are applicable.

Wash hands before breaks and at end of work.

Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

Eye/face protection: With danger of contact with eyes. Tight fitting protective goggles with side protection (EN 166).

Skin protection - Hand protection: Protective nitrile gloves (EN ISO 374). Minimum layer thickness in mm: 0,4 Permeation time (penetration time) in minutes: 240 Protective hand cream recommended. The breakthrough times determined in accordance with EN 16523-1 were not obtained under practical conditions.

Page 5 of 12 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

The recommended maximum wearing time is 50% of breakthrough time.

Skin protection - Other: Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments).

Respiratory protection: Normally not necessary.

Thermal hazards: Not applicable

ആ

Additional information on hand protection - No tests have been performed.

In the case of mixtures, the selection has been made according to the knowledge available and the information about the contents. Selection of materials derived from glove manufacturer's indications.

Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account. Selection of a suitable glove depends not only on the material but also on other quality characteristics and varies from manufacturer to manufacturer.

In the case of mixtures, the resistance of glove materials cannot be predicted and must therefore be tested before use. The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed.

#### 8.2.3 Environmental exposure controls

No information available at present.

#### **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| Physical state:   | Paste, solid.  |
|---|--|
| Colour:   | Yellow, Brown  |
| Odour:  | Characteristic                                       |
| Melting point/freezing point:                             | There is no information available on this parameter. |
| Boiling point or initial boiling point and boiling range: | There is no information available on this parameter. |
| Flammability:   | There is no information available on this parameter. |
| Lower explosion limit:                                    | Does not apply to solids.                            |
| Upper explosion limit:                                    | Does not apply to solids.                            |
| Flash point:  | >200 °C ((Particulars of main substances contained)) |
| Auto-ignition temperature:                                | Does not apply to solids.                            |
| Decomposition temperature:                                | There is no information available on this parameter. |
| pH:   | Mixture is non-soluble (in water).                   |
| Kinematic viscosity:                                      | >20,5 mm2/s (40°C)                                   |
| Solubility:   | Insoluble  |
| Partition coefficient n-octanol/water (log value):        | Does not apply to mixtures.                          |
| Vapour pressure:  | There is no information available on this parameter. |
| Density and/or relative density:                          | <1000 kg/m3 (25°C)                                   |
| Relative vapour density:                                  | Does not apply to solids.                            |
| Particle characteristics:                                 | There is no information available on this parameter. |
| 9.2 Other information                                     |  |
| Explosives:   | Product is not explosive.                            |
| Oxidizing solids:   | No   |
|   |  |

## **SECTION 10: Stability and reactivity**

10.1 Reactivity
The product has not been tested.
10.2 Chemical stability
Stable with proper storage and handling.
10.3 Possibility of hazardous reactions
No dangerous reactions are known.
10.4 Conditions to avoid
See also section 7.
Strong heat
10.5 Incompatible materials

Page 6 of 12 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

See also section 7. Avoid contact with strong oxidizing agents. **10.6 Hazardous decomposition products** See also section 5.2

No decomposition when used as directed.

(GB)·

# **SECTION 11: Toxicological information**

#### 11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

Possibly more information on health effects, see Section 2.1 (classification).

| Toxicity / effect                | Endpoint | Value   | Unit  | Organism | Test method | Notes            |
|----------------------------------|----------|---------|-------|----------|-------------|------------------|
| Acute toxicity, by oral route:   | ATE      | 5078,10 | mg/kg |          |             | calculated value |
| Acute toxicity, by dermal route: | ATE      | 2737,40 | mg/kg |          |             | calculated value |
| Acute toxicity, by inhalation:   |          |         |       |          |             | n.d.a.           |
| Skin corrosion/irritation:       |          |         |       |          |             | n.d.a.           |
| Serious eye damage/irritation:   |          |         |       |          |             | n.d.a.           |
| Respiratory or skin              |          |         |       |          |             | n.d.a.           |
| sensitisation:                   |          |         |       |          |             |                  |
| Germ cell mutagenicity:          |          |         |       |          |             | n.d.a.           |
| Carcinogenicity:                 |          |         |       |          |             | n.d.a.           |
| Reproductive toxicity:           |          |         |       |          |             | n.d.a.           |
| Specific target organ toxicity - |          |         |       |          |             | n.d.a.           |
| single exposure (STOT-SE):       |          |         |       |          |             |                  |
| Specific target organ toxicity - |          |         |       |          |             | n.d.a.           |
| repeated exposure (STOT-RE):     |          |         |       |          |             |                  |
| Aspiration hazard:               |          |         |       |          |             | n.d.a.           |
| Symptoms:                        |          |         |       |          |             | n.d.a.           |

| Toxicity / effect                | Endpoint | Value | Unit    | Organism | Test method            | Notes           |
|----------------------------------|----------|-------|---------|----------|------------------------|-----------------|
| Acute toxicity, by oral route:   | LD50     | >2000 | mg/kg   | Rat      | OECD 423 (Acute Oral   |                 |
|                                  |          |       |         |          | Toxicity - Acute Toxic |                 |
|                                  |          |       |         |          | Class Method)          |                 |

# SECTION 13: Disposal considerations

# 13.1 Waste treatment methods

#### For the substance / mixture / residual amounts

Soaked polluted cloths, paper or other organic materials represent a fire hazard and should be controlled, collected and disposed of. EC disposal code no.:

The waste codes are recommendations based on the scheduled use of this product.

Owing to the user's specific conditions for use and disposal, other waste codes may be

allocated under certain circumstances. (2014/955/EU)

12 01 12 spent waxes and fats

13 08 99 wastes not otherwise specified

œ

Recommendation: Sewage disposal shall be discouraged.

Pay attention to local and national official regulations.

E.g. dispose at suitable refuse site.

E.g. suitable incineration plant.

#### For contaminated packing material

Pay attention to local and national official regulations. Empty container completely. Uncontaminated packaging can be recycled. Dispose of packaging that cannot be cleaned in the same manner as the substance.

# **SECTION 14: Transport information**

| General statements                  |                |  |
|-------------------------------------|----------------|--|
| 14.1. UN number or ID number:       | n.a.           |  |
| Transport by road/by rail (ADR/RID) |                |  |
| 14.2. UN proper shipping name:      |                |  |
| 14.3. Transport hazard class(es):   | n.a.           |  |
| 14.4. Packing group:                | n.a.           |  |
| Classification code:                | n.a.           |  |
| LQ:                                 | n.a.           |  |
| 14.5. Environmental hazards:        | Not applicable |  |
| Tunnel restriction code:            |                |  |
| Transport by sea (IMDG-code)        |                |  |
| 14.2. UN proper shipping name:      |                |  |
| 14.3. Transport hazard class(es):   | n.a.           |  |
| 14.4. Packing group:                | n.a.           |  |
| Marine Pollutant:                   | n.a            |  |
| 14.5. Environmental hazards:        | Not applicable |  |
| Transport by air (IATA)             |                |  |
| 14.2. UN proper shipping name:      |                |  |

Page 10 of 12 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 21.03.2022 / 0015 Replacing version dated / version: 17.02.2022 / 0014 Valid from: 21.03.2022 PDF print date: 21.03.2022 Mehrzweckfett

14.3. Transport hazard class(es):14.4. Packing group:14.5. Environmental hazards:

അ

#### 14.6. Special precautions for user

Unless specified otherwise, general measures for safe transport must be followed.

14.7. Maritime transport in bulk according to IMO instruments

Non-dangerous material according to Transport Regulations.

#### **SECTION 15: Regulatory information**

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Observe restrictions: General hygiene measures for the handling of chemicals are applicable.

Directive 2010/75/EU (VOC):

< 3 %

#### **15.2 Chemical safety assessment**

A chemical safety assessment is not provided for mixtures.

**SECTION 16: Other information** 

Revised sections:

8, 11, 12

# Classification and processes used to derive the classification of the mixture in accordance with the ordinance (EG) 1272/2008 (CLP):

Not applicable

The following phrases represent the posted Hazard Class and Risk Category Code (GHS/CLP) of the product and the constituents (specified in Section 2 and 3). H317 May cause an allergic skin reaction. H319 Causes serious eye irritation.

H412 Harmful to aquatic life with long lasting effects. Eye Irrit. — Eye irritation

Skin Sens. — Skin sensitization Aquatic Chronic — Hazardous to the aquatic environment - chronic

#### Key literature references and sources for data:

Regulation (EC) No 1907/2006 (REACH) and Regulation (EC) No 1272/2008 (CLP) as amended.

Guidelines for the preparation of safety data sheets as amended (ECHA).

Guidelines on labelling and packaging according to the Regulation (EG) Nr. 1272/2008 (CLP) as amended (ECHA).

Safety data sheets for the constituent substances. ECHA Homepage - Information about chemicals.

ECHA Homepage - Information about chemi

GESTIS Substance Database (Germany).

German Environment Agency "Rigoletto" information site on substances that are hazardous to water (Germany).

EU Occupation Exposure Limits Directives 91/322/EEC, 2000/39/EC, 2006/15/EC, 2009/161/EU, (EU) 2017/164, (EU) 2019/1831, each as amended.

National Lists of Occupational Exposure Limits for each country as amended.

Regulations on the transport of hazardous goods by road, rail, sea and air (ADR, RID, IMDG, IATA) as amended.
