## Safety data sheet according to Regulation (EC) No 1907/2006, Annex II

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

## **1.1 Product identifier**

അ

# Speed Tec Diesel Konzentrat

 1.2 Relevant identified uses of the substance or mixture and uses advised against Relevant identified uses of the substance or mixture:
 Fuel additive
 Uses advised against:
 No information available at present.

#### 1.3 Details of the supplier of the safety data sheet

LIQUI MOLY GmbH Jerg-Wieland-Str. 4 89081 Ulm-Lehr Tel.: (+49) 0731-1420-0 Fax: (+49) 0731-1420-88

Qualified person's e-mail address: info@chemical-check.de, k.schnurbusch@chemical-check.de Please DO NOT use for requesting Safety Data Sheets.

### 1.4 Emergency telephone number Emergency information services / official advisory body:

Telephone number of the company in case of emergencies: +49 (0) 700 / 24 112 112 (LMR)

#### **SECTION 2: Hazards identification**

## 2.1 Classification of the substance or mixture

Classification according to Regulation (EC) 1272/2008 (CLP)

| Hazard class    | Hazard category | Hazard statement                                      |
|-----------------|-----------------|-------------------------------------------------------|
| Skin Irrit.     | 2               | H315-Causes skin irritation.                          |
| Eye Dam.        | 1               | H318-Causes serious eye damage.                       |
| Asp. Tox.       | 1               | H304-May be fatal if swallowed and enters airways.    |
| STOT SE         | 3               | H336-May cause drowsiness or dizziness.               |
| Aquatic Chronic | 2               | H411-Toxic to aquatic life with long lasting effects. |
| STOT SE         | 2               | H371-May cause damage to organs by inhalation (lung). |

2.2 Label elements Labeling according to Regulation (EC) 1272/2008 (CLP)

Page 2 of 20

œ

Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

H315-Causes skin irritation. H318-Causes serious eye damage. H304-May be fatal if swallowed and enters airways. H336-May cause drowsiness or dizziness. H411-Toxic to aquatic life with long lasting effects. H371-May cause damage to organs by inhalation (lung).

P101-If medical advice is needed, have product container or label at hand. P102-Keep out of reach of children. P260-Do not breathe vapours or spray. P273-Avoid release to the environment. P280-Wear protective gloves / eye protection / face protection. P301+P310-IF SWALLOWED: Immediately call a POISON CENTER / doctor. P305+P351+P338-IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P331-Do NOT induce vomiting. P405-Store locked up.

P501-Dispose of contents / container to an approved waste disposal facility.

Hydrocarbons, C11-C14, n-alkanes, isoalkanes, cyclics, <2% aromatics Hydrocarbons, C10, aromatics, <1% naphthalene Bornan-2-one

#### 2.3 Other hazards

The mixture does not contain any vPvB substance (vPvB = very persistent, very bioaccumulative) or is not included under XIII of the regulation (EC) 1907/2006 (< 0,1 %).

The mixture does not contain any PBT substance (PBT = persistent, bioaccumulative, toxic) or is not included under XIII of the regulation (EC) 1907/2006 (< 0.1 %).

The mixture contains a substance with endocrine disrupting properties. The substance is named in Section 3.

For the text of the H-phrases and classification codes (GHS/CLP), see Section 16. The substances named in this section are given with their actual, appropriate classification! For substances that are listed in appendix VI, table 3.1 of the regulation (EC) no. 1272/2008 (CLP regulation) this means that all notes that may be given here for the named classification have been taken into account.

### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

First-aiders should ensure they are protected!

Never pour anything into the mouth of an unconscious person!

#### Inhalation

Remove person from danger area.

Supply person with fresh air and consult doctor according to symptoms.

If the person is unconscious, place in a stable side position and consult a doctor.

#### Skin contact

Remove polluted, soaked clothing immediately, wash thoroughly with plenty of water and soap, in case of irritation of the skin (flare), consult a doctor.

Eye contact

Page 4 of 20 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

#### Remove contact lenses.

Wash thoroughly for several minutes using copious water - call doctor immediately, have Data Sheet available.

Protect uninjured eye. Follow-up examination by an ophthalmologist.

#### Ingestion

ആ

Rinse the mouth thoroughly with water. Do not induce vomiting - give copious water to drink. Consult doctor immediately. Danger of aspiration. In case of vomiting, keep head low so that the stomach content does not reach the lungs. 4.2 Most important symptoms and effects, both acute and delayed If applicable delayed symptoms and effects can be found in section 11 and the absorption route in section 4.1. In certain cases, the symptoms of poisoning may only appear after an extended period / after several hours. Headaches Dizziness Fatigue

With long-term contact: Drying of the skin. Dermatitis (skin inflammation) Ingestion: Nausea Vomiting Danger of aspiration. Oedema of the lungs Chemical pneumonitis (condition similar to pneumonia)

4.3 Indication of any immediate medical attention and special treatment needed

Subsequent observation for pneumonia and pulmonary oedema.

#### SECTION 5: Firefighting measures

# 5.1 Extinguishing media

Suitable extinguishing media

Water jet spray/foam/CO2/dry extinguisher Unsuitable extinguishing media

High volume water jet

#### 5.2 Special hazards arising from the substance or mixture

In case of fire the following can develop: Oxides of carbon Metal oxides Oxides of nitrogen Toxic dases Danger of bursting (explosion) when heated Soot

#### 5.3 Advice for firefighters

For personal protective equipment see Section 8. In case of fire and/or explosion do not breathe fumes. Protective respirator with independent air supply. According to size of fire Full protection, if necessary. Cool container at risk with water. Dispose of contaminated extinction water according to official regulations.

### SECTION 6: Accidental release measures

#### 6.1 Personal precautions, protective equipment and emergency procedures 6.1.1 For non-emergency personnel

In case of spillage or accidental release, wear personal protective equipment as specified in section 8 to prevent contamination.

Ensure sufficient ventilation, remove sources of ignition. Avoid dust formation with solid or powder products.

Leave the danger zone if possible, use existing emergency plans if necessary.

Page 5 of 20 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

Do not take any measures that are associated with personal risk or have not been sufficiently trained. Keep unprotected persons away. Ensure sufficient supply of air. Remove possible causes of ignition - do not smoke. Avoid contact with eyes or skin.

If applicable, caution - risk of slipping.

#### 6.1.2 For emergency responders

See section 8 for suitable protective equipment and material specifications.

#### 6.2 Environmental precautions

If leakage occurs, dam up.

ആ

Resolve leaks if this possible without risk. Prevent surface and ground-water infiltration, as well as ground penetration. Prevent from entering drainage system.

If accidental entry into drainage system occurs, inform responsible authorities.

6.3 Methods and material for containment and cleaning up

Soak up with absorbent material (e.g. universal binding agent, sand, diatomaceous earth) and dispose of according to Section 13.

Fill the absorbed material into lockable containers.

#### 6.4 Reference to other sections

For personal protective equipment see Section 8 and for disposal instructions see Section 13.

#### **SECTION 7: Handling and storage**

In addition to information given in this section, relevant information can also be found in section 8 and 6.1.

## 7.1 Precautions for safe handling

7.1.1 General recommendations

Ensure good ventilation.

Avoid inhalation of the vapours.

Avoid contact with eyes or skin.

Eating, drinking, smoking, as well as food-storage, is prohibited in work-room.

Observe directions on label and instructions for use.

Use working methods according to operating instructions. Take explosion-prevention measures if applicable.

#### 7.1.2 Notes on general hygiene measures at the workplace

General hygiene measures for the handling of chemicals are applicable.

Wash hands before breaks and at end of work.

 $\label{eq:keep} \ensuremath{\mathsf{Keep}}\xspace \ensuremath{\mathsf{away}}\xspace \ensuremath{\mathsf{from}}\xspace \ensuremath{\mathsf{form}}\xspace \ensuremath{\mathsf{from}}\xspace \ensuremath{$ 

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

#### 7.2 Conditions for safe storage, including any incompatibilities

Keep out of access to unauthorised individuals. Store product closed and only in original packing. Not to be stored in gangways or stair wells. Store in a well-ventilated place.

Store in a dry place.

Store cool.

Solvent resistant floor

#### 7.3 Specific end use(s)

No information available at present.

#### **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

Workplace exposure limit (WEL) of the total hydrocarbon solvent content of the mixture (RCP method according to EH40): 500 mg/m3

WEL-TWA = Workplace Exposure Limit - Long-term exposure limit (8-hour TWA (= time weighted average) reference period) EH40. AGW = "Arbeitsplatzgrenzwert" (workplace limit value, Germany).

(8) = Inhalable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (9) = Respirable fraction (Directive 2017/164/EU, Directive 2004/37/CE). (11) = Inhalable fraction (Directive 2004/37/CE). (12) = Inhalable fraction. Respirable fraction in those Member States that implement, on the date of the entry into force of this Directive, a biomonitoring system with a biological limit value not exceeding 0,002 mg Cd/g creatinine in urine (Directive 2004/37/CE). | WEL-STEL = Workplace Exposure Limit - Short-term exposure limit (15-minute reference period).

(8) = Inhalable fraction (2017/164/EU, 2017/2398/EU). (9) = Respirable fraction (2017/164/EU), 2017/2398/EU). (10) = Short-term exposure limit value in relation to a reference period of 1 minute (2017/164/EU). | BMGV = Biological monitoring guidance value EH40. BGW = "Biologischer Grenzwert" (biological limit value, Germany) | Other information: Sen = Capable of causing occupational asthma. Sk = Can be absorbed through skin. Carc = Capable of causing cancer and/or heritable genetic damage.

\*\* = The exposure limit for this substance is repealed through the TRGS 900 (Germany) of January 2006 with the goal of revision. (13) = The substance can cause sensitisation of the skin and of the respiratory tract (Directive 2004/37/CE), (14) = The substance can cause sensitisation of the skin (Directive 2004/37/CE).

#### 8.2 Exposure controls 8.2.1 Appropriate engineering controls

Ensure good ventilation. This can be achieved by local suction or general air extraction.

If this is insufficient to maintain the concentration under the WEL or AGW values, suitable breathing protection should be worn.

Applies only if maximum permissible exposure values are listed here.

Suitable assessment methods for reviewing the effectiveness of protection measures adopted include metrological and non-metrological investigative techniques.

These are specified by e.g. EN 14042.

EN 14042 "Workplace atmospheres. Guide for the application and use of procedures for the assessment of exposure to chemical and biological agents".

## 8.2.2 Individual protection measures, such as personal protective equipment

General hygiene measures for the handling of chemicals are applicable.

Wash hands before breaks and at end of work.

Keep away from food, drink and animal feedingstuffs.

Remove contaminated clothing and protective equipment before entering areas in which food is consumed.

Eye/face protection: Tight fitting protective goggles with side protection.

Skin protection - Hand protection: Chemical resistant protective gloves (EN ISO 374). Recommended Protective nitrile gloves (EN ISO 374). Minimum layer thickness in mm: 0,5

Permeation time (penetration time) in minutes: 60

The breakthrough times determined in accordance with EN 16523-1 were not obtained under practical conditions. The recommended maximum wearing time is 50% of breakthrough time. Protective hand cream recommended.

Skin protection - Other: Protective working garments (e.g. safety shoes EN ISO 20345, long-sleeved protective working garments).

Respiratory protection: If OES or MEL is exceeded.

Page 9 of 20 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

Filter A P2 (EN 14387), code colour brown, white Observe wearing time limitations for respiratory protection equipment.

Thermal hazards: Not applicable

ആ

Additional information on hand protection - No tests have been performed.

In the case of mixtures, the selection has been made according to the knowledge available and the information about the contents. Selection of materials derived from glove manufacturer's indications.

Final selection of glove material must be made taking the breakthrough times, permeation rates and degradation into account. Selection of a suitable glove depends not only on the material but also on other quality characteristics and varies from manufacturer to manufacturer.

In the case of mixtures, the resistance of glove materials cannot be predicted and must therefore be tested before use. The exact breakthrough time of the glove material can be requested from the protective glove manufacturer and must be observed.

#### 8.2.3 Environmental exposure controls

No information available at present.

#### **SECTION 9: Physical and chemical properties**

#### 9.1 Information on basic physical and chemical properties

| Physical state:                          | Liquid            |
|------------------------------------------|-------------------|
| Colour:                                  | Light, Amber      |
| Odour:                                   | Not determined    |
| Odour threshold:                         | Not determined    |
| pH-value:                                | Not determined    |
| Melting point/freezing point:            | Not determined    |
| Initial boiling point and boiling range: | Not determined    |
| Flash point:                             | >61 °C            |
| Evaporation rate:                        | Not determined    |
| Flammability (solid, gas):               | n.a.              |
| Lower explosive limit:                   | Not determined    |
| Upper explosive limit:                   | Not determined    |
| Vapour pressure:                         | Not determined    |
| Vapour density (air = 1):                | Not determined    |
| Density:                                 | 0,911 g/ml (20°C) |
| Bulk density:                            | n.a.              |
| Solubility(ies):                         | Not determined    |
| Water solubility:                        | Not determined    |
| Partition coefficient (n-octanol/water): | Not determined    |
| Auto-ignition temperature:               | Not determined    |
| Decomposition temperature:               | Not determined    |
| Viscosity:                               | <7 mm2/s          |
| Explosive properties:                    | Not determined    |
| Oxidising properties:                    | Not determined    |
| 9.2 Other information                    |                   |
| Miscibility:                             | Not determined    |
| Fat solubility / solvent:                | Not determined    |
| Conductivity:                            | Not determined    |
| Surface tension:                         | Not determined    |
| Solvents content:                        | Not determined    |
|                                          |                   |

### **SECTION 10: Stability and reactivity**

#### **10.1 Reactivity**

Stable when handled and stored correctly. Possible build up of flammable vapour/air mixture.

#### **10.2 Chemical stability**

Stable with proper storage and handling.

## 10.3 Possibility of hazardous reactions

No dangerous reactions are known.

Page 10 of 20

Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

#### **10.4 Conditions to avoid**

Heating, open flame, ignition sources

## 10.5 Incompatible materials

Avoid contact with strong oxidizing agents. Naphthalene Potassium permanganate Chlorates Avoid contact with other chemicals.

#### **10.6 Hazardous decomposition products**

No decomposition when used as directed.

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

Possibly more information on health effects, see Section 2.1 (classification).

### **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

#### For the substance / mixture / residual amounts

Soaked polluted cloths, paper or other organic materials represent a fire hazard and should be controlled, collected and disposed of. Do not carry cleaning cloths soaked in product in trouser pockets.

EC disposal code no.:

The waste codes are recommendations based on the scheduled use of this product.

Owing to the user's specific conditions for use and disposal, other waste codes may be

allocated under certain circumstances. (2014/955/EU)

13 07 03 other fuels (including mixtures)

Recommendation:

Sewage disposal shall be discouraged.

Pay attention to local and national official regulations.

Page 17 of 20 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

E.g. suitable incineration plant. E.g. dispose at suitable refuse site.

ആ

#### For contaminated packing material

Pay attention to local and national official regulations.

Empty container completely.

Uncontaminated packaging can be recycled.

Dispose of packaging that cannot be cleaned in the same manner as the substance.

15 01 10 packaging containing residues of or contaminated by hazardous substances

#### **SECTION 14: Transport information**

#### **General statements** 14.1. UN number: 3082 Transport by road/by rail (ADR/RID) 14.2. UN proper shipping name: UN 3082 ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (HYDROCARBONS, C10, AROMATICS, BORNAN-2-ONE) 14.3. Transport hazard class(es): q 14.4. Packing group: Ш Classification code: M6 LQ: 5 L 14.5. Environmental hazards: environmentally hazardous Tunnel restriction code: Transport by sea (IMDG-code) 14.2. UN proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, N.O.S. (HYDROCARBONS, C10, AROMATICS, BORNAN-2-ONE) 411h, 14.3. Transport hazard class(es): 14.4. Packing group: Ш EmS: F-A, S-F Marine Pollutant: Yes 14.5. Environmental hazards: environmentally hazardous Transport by air (IATA) 14.2. UN proper shipping name: Environmentally hazardous substance, liquid, n.o.s. (HYDROCARBONS, C10, AROMATICS, BORNAN-2-ONE) 14.3. Transport hazard class(es): 9 14.4. Packing group: Ш 14.5. Environmental hazards: environmentally hazardous 14.6. Special precautions for user Persons employed in transporting dangerous goods must be trained. All persons involved in transporting must observe safety regulations. Precautions must be taken to prevent damage. 14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code Freighted as packaged goods rather than in bulk, therefore not applicable. Minimum amount regulations have not been taken into account. Danger code and packing code on request. Comply with special provisions.

## **SECTION 15: Regulatory information**

### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Observe restrictions:

Comply with national regulations/laws governing maternity protection (national implementation of the Directive 92/85/EEC)! Regulation (EC) No 1907/2006, Annex XVII

Phenol, dodecyl-, branched

Comply with national regulations/laws governing the protection of young people at work (national implementation of the Directive 94/33/EC)! Comply with trade association/occupational health regulations.

Directive 2012/18/EU ("Seveso III"), Annex I, Part 1 - The following categories apply to this product (others may also need to be considered according to storage, handling etc.):

The Notes to Annex 1 of Directive 2012/18/EU, in particular those named in the tables here and notes 1-6, must be taken into account when assigning categories and qualifying quantities.

100 %

Directive 2010/75/EU (VOC): REGULATION (EC) No 648/2004

n.a.

Observe incident regulations.

#### 15.2 Chemical safety assessment

A chemical safety assessment is not provided for mixtures.

#### **SECTION 16: Other information**

2.3, 3, 6, 11, 12

Revised sections:

Employee training in handling dangerous goods is required. These details refer to the product as it is delivered. Employee instruction/training in handling hazardous materials is required.

# Classification and processes used to derive the classification of the mixture in accordance with the ordinance (EG) 1272/2008 (CLP):

| Classification in accordance with regulation<br>(EC) No. 1272/2008 (CLP) | Evaluation method used                             |
|--------------------------------------------------------------------------|----------------------------------------------------|
| Skin Irrit. 2, H315                                                      | Classification according to calculation procedure. |
| Eye Dam. 1, H318                                                         | Classification according to calculation procedure. |
| Asp. Tox. 1, H304                                                        | Classification according to calculation procedure. |
| STOT SE 3, H336                                                          | Classification according to calculation procedure. |
| Aquatic Chronic 2, H411                                                  | Classification according to calculation procedure. |
| STOT SE 2, H371                                                          | Classification according to calculation procedure. |

The following phrases represent the posted Hazard Class and Risk Category Code (GHS/CLP) of the product and the constituents (specified in Section 2 and 3).

H314 Causes severe skin burns and eye damage.

H360F May damage fertility.

H226 Flammable liquid and vapour.

H371 May cause damage to organs by inhalation. H302 Harmful if swallowed.

H304 May be fatal if swallowed and enters airways.

H315 Causes skin irritation.

H318 Causes serious eye damage.

H319 Causes serious eye irritation.

H332 Harmful if inhaled.

H335 May cause respiratory irritation.

H336 May cause drowsiness or dizziness.

H351 Suspected of causing cancer.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

H411 Toxic to aquatic life with long lasting effects. H228 Flammable solid.

Skin Irrit. — Skin irritation Eye Dam. — Serious eye damage

Page 19 of 20 Safety data sheet according to Regulation (EC) No 1907/2006, Annex II Revision date / version: 18.08.2021 / 0007 Replacing version dated / version: 18.08.2020 / 0006 Valid from: 18.08.2021 PDF print date: 24.08.2021 Speed Tec Diesel Konzentrat

ആ

Asp. Tox. — Aspiration hazard STOT SE — Specific target organ toxicity - single exposure - narcotic effects Aquatic Chronic — Hazardous to the aquatic environment - chronic STOT SE — Specific target organ toxicity - single exposure Flam. Sol. — Flammable solid Acute Tox. — Acute toxicity - inhalation Flam. Liq. — Flammable liquid Eye Irrit. — Eye irritation STOT SE — Specific target organ toxicity - single exposure - respiratory tract irritation Acute Tox. — Acute toxicity - oral Carc. — Carcinogenicity Aquatic Acute — Hazardous to the aquatic environment - acute Skin Corr. — Skin corrosion Repr. — Reproductive toxicity
